BOLT & NUT™**
FASTENER + FIXING
TECHNOLOGIES

FASTENER PRODUCT GUIDE

Mr. Bolt and Nut is a dedicated importer and distributor of fasteners leveraging decades of industry expertise in sourcing and providing bolts, nuts, screws, threaded rod and washers for various applications. Our extensive product range includes a variety of materials like mild steel, high tensile steel, stainless steel, brass and nylon. We also stock petro-chemical grade B7 threaded rod with matching nuts. Specialised materials like Duplex Stainless Steel, Bumax, Inconel, Hastelloy, Titanium and various others are also catered for. Thread types range from Metric, Trapezoidal, UNC to UNF. Less common thread styles are available on demand. Material grades include 4.8, 8.8, 10.9 and 12.9 and stainless steel grades A2 and A4. Surface coatings such as electro zinc plating and hot dipped galvanizing offer both aesthetic and functional needs as well as enhancing corrosion resistance.

Our customer service extends through telesales, counter sales, and digital communication via email and WhatsApp. Our technical sales team is readily available for onsite visits to ensure we meet your fastening needs efficiently and effectively.

We look forward to being of service.
